

FRAGRANCE FREE

Making *your* world a cleaner, better-smelling place.

Medical facilities and universities across the country are becoming more concerned about the fragrances their patrons experience.

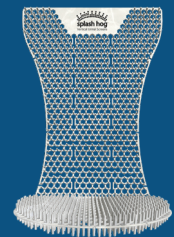

A study showed almost 19% of those surveyed reported adverse health effects from air fresheners. This study shows having fragrance and odor-free solutions for facilities is a growing need.

**SPLASH HOG
VERTICAL URINAL SCREEN**

STOPS SPLASH WHERE GUYS AIM

- Fragrance & Odor Free
- 60-Day Antimicrobial
- Designed for Scent-Free Facilities
- Ideal for Medical Facilities & Universities

**MINI SPLASH HOG
VERTICAL URINAL SCREEN**

Game Changer

The Splash Hog Vertical Urinal Screen changed the urinal screen game when it became the only vertical urinal screen on the market with its ability to stop splash where guys aim, up the back wall.

We have now taken its effectiveness to the next level by offering a fragrance and odor-free version that also **includes an antimicrobial to stop odors at the molecular level**. In addition, this screen is genuinely fragrance and odor-free. It does not contain any scent that can affect someone who is fragrance-sensitive.
